

# Locale Central

Turn paper forms into digital with ease.

We know how much of a struggle it is to record data out on the field. Locale Central's mobile app was built to make it easy to record accurate data, even when you're offline.

## Get up and running quickly

Start with one of our many industry data-entry templates and modify it to record data in the way that works best for your organisation.

## Easy control of your data

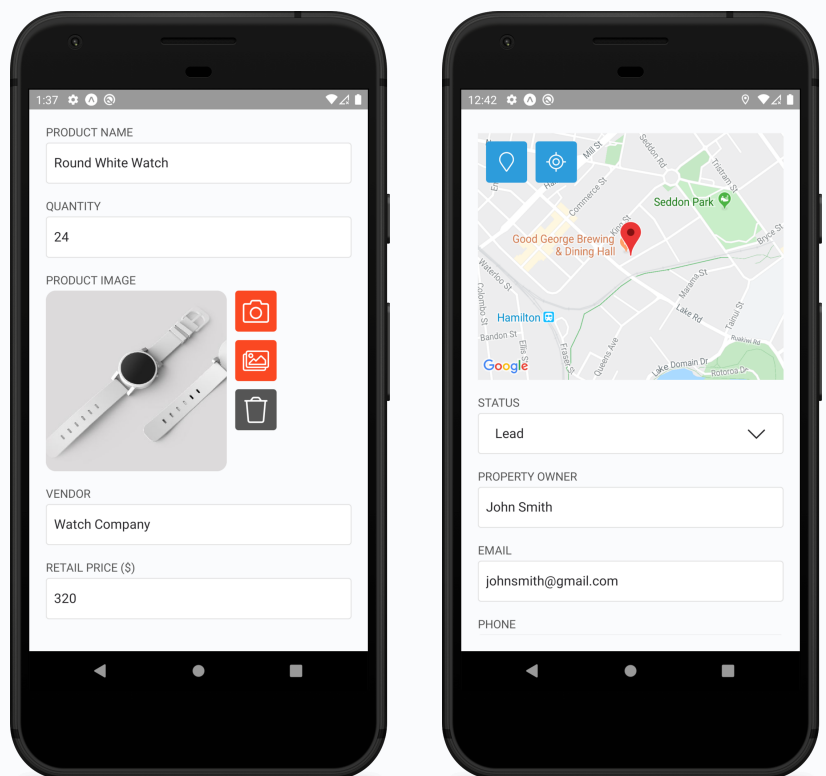

Apply filters and sorts to your data so you only see what matters. Export your data as a CSV or PDF from your computer or phone.

## Built for maps and tables

Record bearing and GPS coordinates from your phone with the press of a button. Manage all of your data within an interactive map or table.

## Key Features

- ✓ Available on Android, iOS, and the web.
- ✓ Export your data as a csv or pdf from your phone or computer.
- ✓ Record data even when you're offline.
- ✓ Automatically syncs data on computer and mobile devices.
- ✓ Over 20 different field options to choose from for creating data entry forms.
- ✓ Record your bearing and GPS coordinates from your phone.
